BEST SERVICE TRANSLATIONS (AND DRAFT TRANSLATIONS)

Best Service Translations are checked by two other people in addition to the actual translator. The prices for Best Service Translations are given below. In the case of Patents, Draft / Rough Translations cost 65% of the Best Service Translation prices, are checked only by the translator himself and are for when the budget is low and accuracy is not so important. However, our Draft Translations compare superbly well against similar products sourced elsewhere, and are almost certainly a better buy. However, Best Service Translations are the translation of choice when accuracy **IS** required.

Papers, Drug Interview Forms and Clinical Study work are more expensive because there tends to be much less text repetition.

Please be aware that all work required within 5 working days must be booked in. Clients may choose to be billed per 55 keystrokes or per 1000 words in the translation product, or per 1000 Japanese characters in the source document. Discounts are available to Clients purchasing more than Euros 30,000 translation per year.
